

Santa's Workshop

Guide and frequently asked questions

In this guide

1. How to start
2. The calendar and doors
3. How to open a door
4. Gift of the day and crafts
5. Snowflakes, titles and bonuses
6. Installing on iPhone
7. Installing on Android and computer
8. Several devices
9. Settings: language, sound, reset
10. Frequently asked questions

How to start

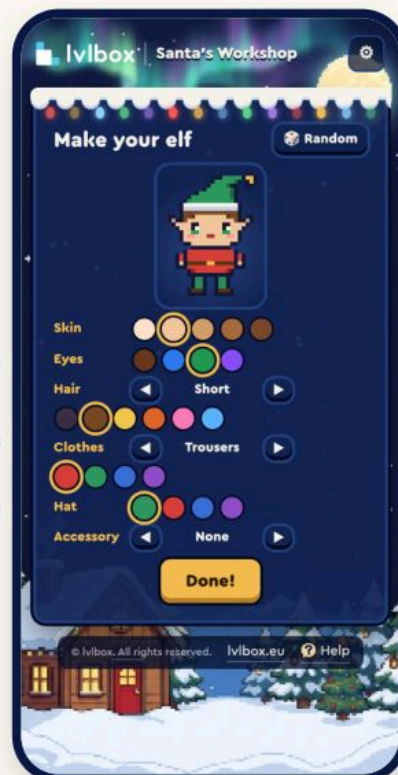

The first start takes a minute. Everything is saved automatically.

1. Choose the game language

2. Practice language and name

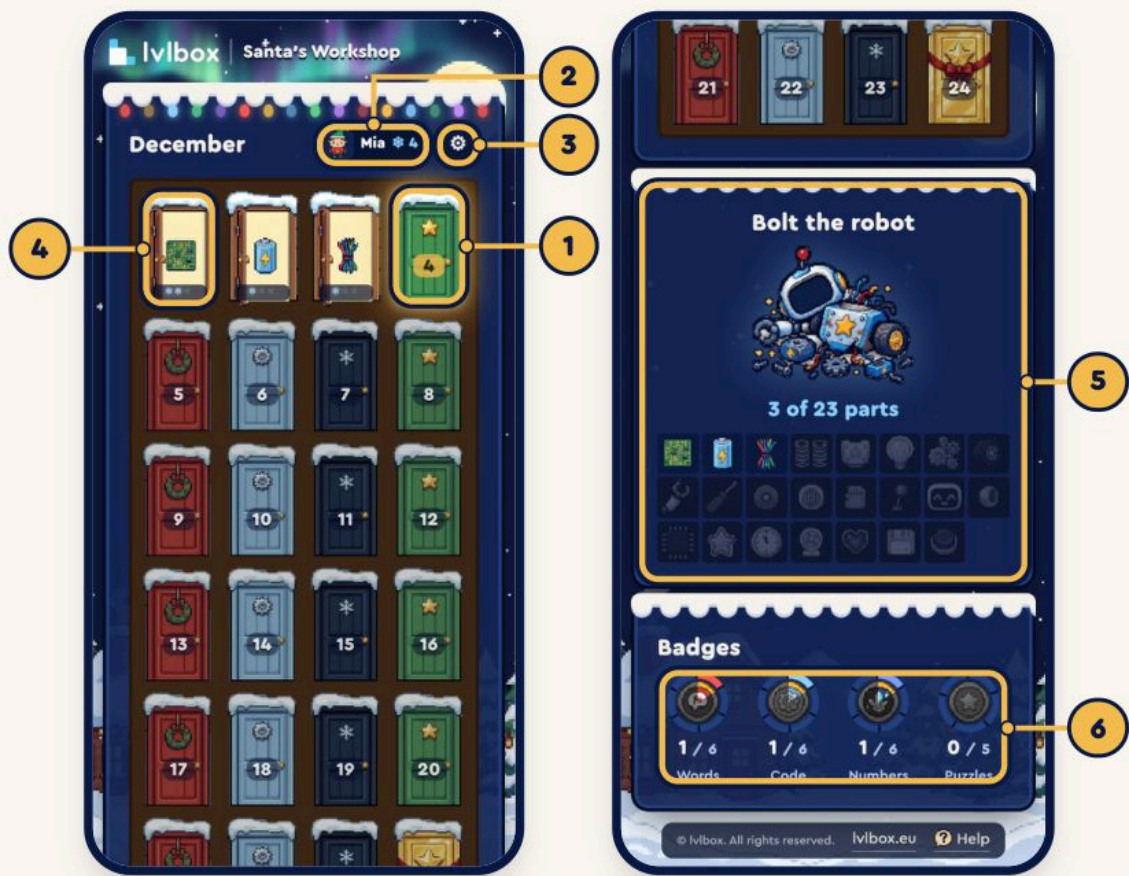

3. Create your elf

- A** The language you want to practise: English or Spanish.
- B** The player's name. It appears in Santa's letter and on the certificate.
- C** «Let's go!» opens the elf maker. You can change your elf at any time.

 Then the game briefly shows you where everything is. You can skip the tips and turn them on again in the settings.

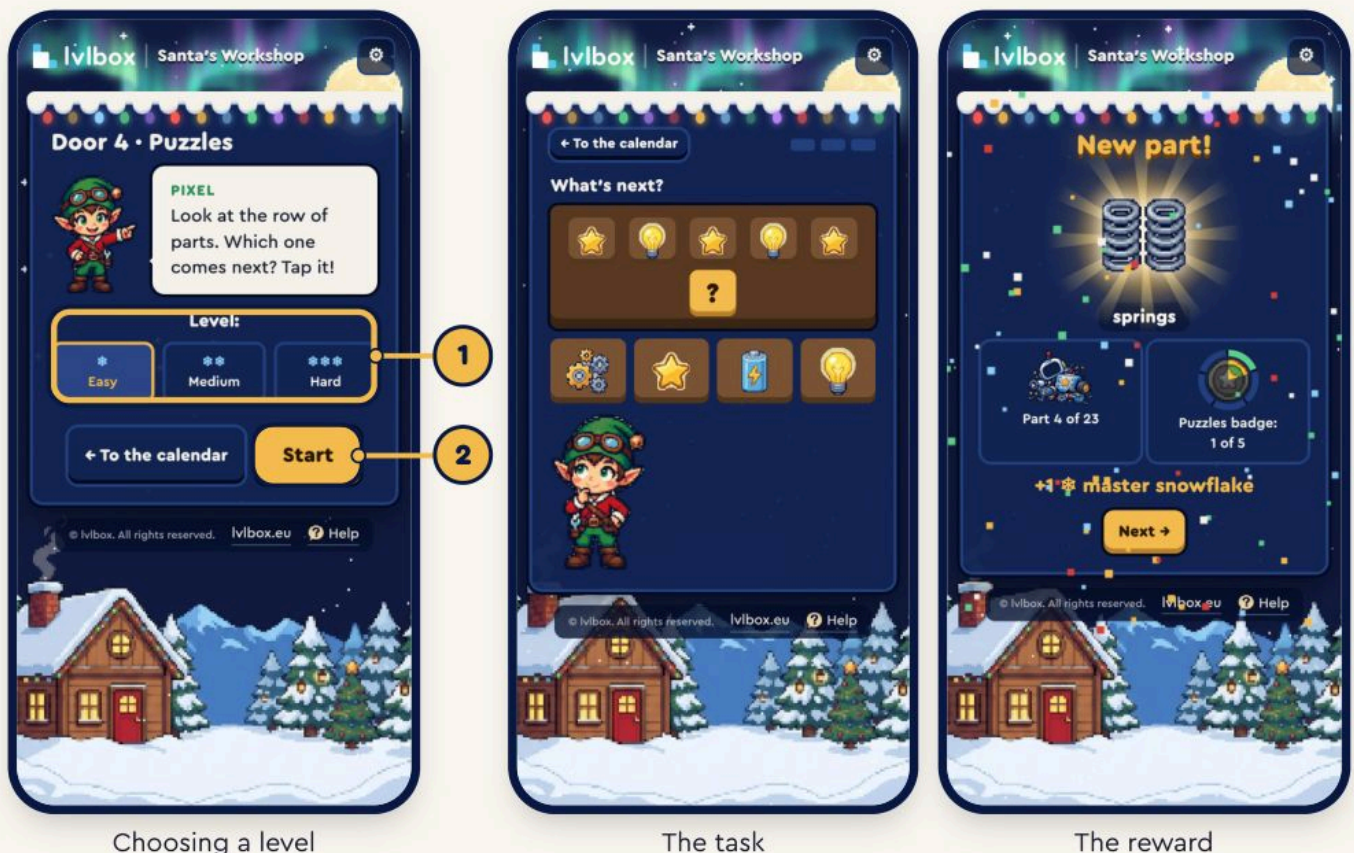

1 The calendar and doors

- 1 **Today's door** glows. Tap it to begin.
- 2 **Profile:** your elf, name and number of snowflakes.
- 3 **Settings:** sound, language, help.
- 4 **An opened door:** it shows Bolt's part and the snowflakes for the levels you completed.
- 5 **Bolt the robot** is built one part at a time, one for each door.
- 6 **Badges:** words, code, numbers, puzzles.

17 Every day from 1 to 24 December a new door opens. Missed doors stay open, you can do them later.

How to open a door

Choosing a level

The task

The reward

- 1 **Level:** every door has tasks of different difficulty: * easy, ** medium and *** hard. Choose the one that suits you.
- 2 **«Start»** opens the task. Mistakes are fine: the elf gives a hint and lets you try again.

★ You can play the same door on another level. Each new level gives you one more snowflake.

🌲 This is a festive calendar. It's not about marks, it's about a good mood: have fun, learn something, and then do the screen-free tasks with family and friends.

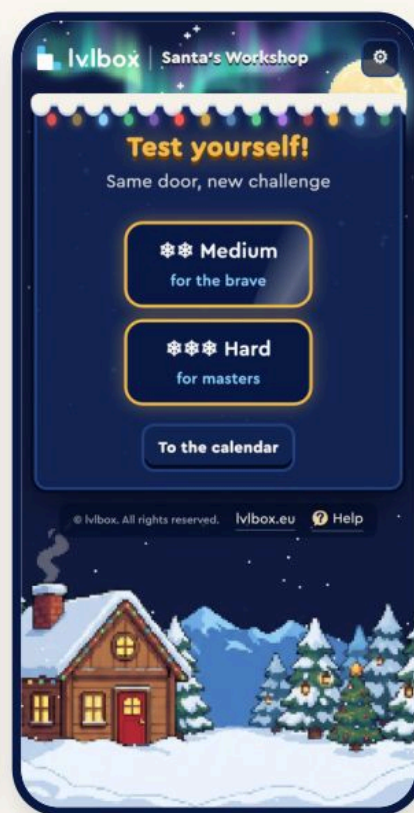

Gift of the day and crafts

Tap the gift

Inside: the craft of the day

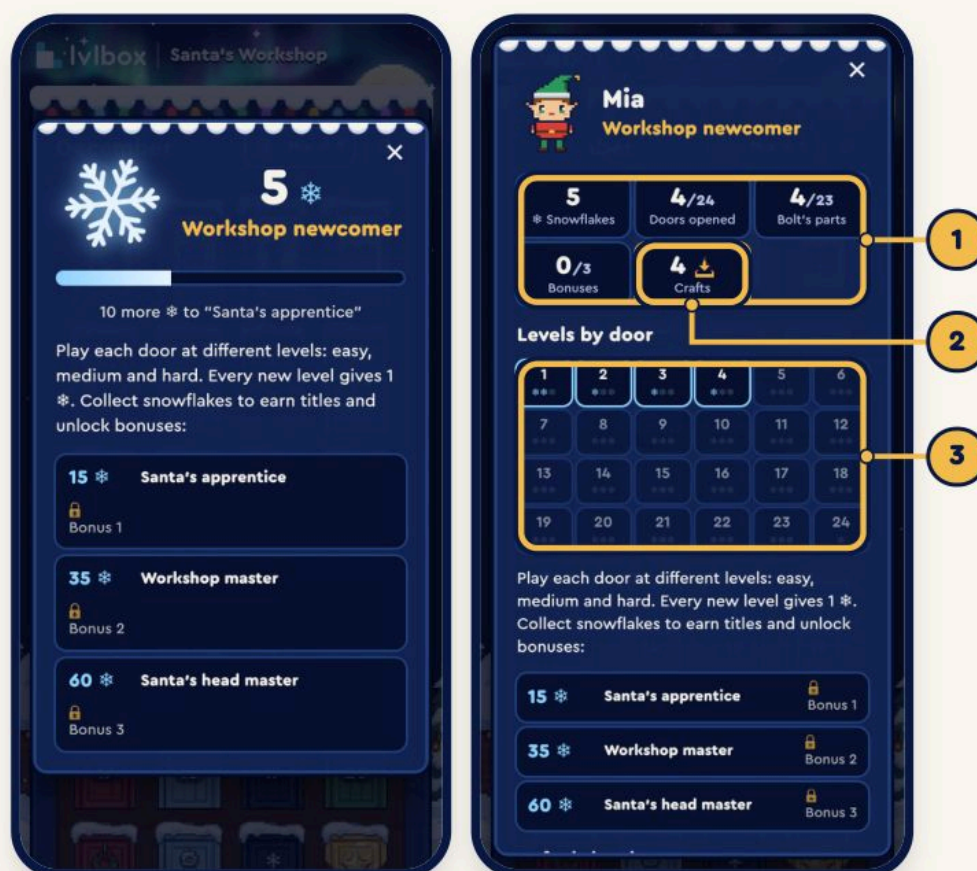

Test yourself

- 1 **The gift:** tap it to download a PDF with today's craft.
- 2 **Screen-free task:** a small activity at home, with family or friends.

You can download all PDFs again from your profile. After door 24 a chest opens with all crafts and bonuses in one file.

❄️ Snowflakes, titles and bonuses

Snowflakes	Title	Bonus
15 ❄️	Santa's apprentice	Colouring pages (PDF)
35 ❄️	Workshop master	Board game (PDF)
60 ❄️	Santa's head master	Personal certificate (an image with your name and a PDF to print)

📄 All bonuses are digital PDF files. Save them and print them whenever you like, as many times as you like.

- 1 Your results:** how many snowflakes you collected, doors you completed, parts of Bolt you found and bonuses you unlocked.
- 2 Crafts:** tap to see the crafts from the doors you completed. You can download each one again as a PDF.
- 3 Levels by door:** under each door number, snowflakes show which levels you have completed. That way you can see where to earn more snowflakes.

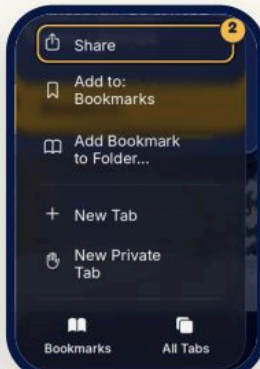

Installing on iPhone

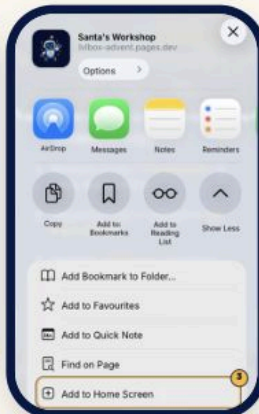

Installing turns the game into an app with Bolt's icon. Install it from **Safari**.

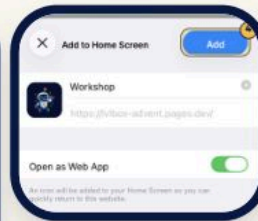

1. Tap «...» at the bottom right

2. Tap «Share»

3. Scroll down: «Add to Home Screen»

4. Tap «Add»

5. Done! Open the game from the icon

Opened it in Chrome? On iPhone you can't install from Chrome. Tap the «Share» icon in the address bar, choose «Open in Safari», then repeat steps 1–4.

On older iPhones the «Share» button ↑ is right at the bottom of the screen, without «...».

Demo

this is the trial version

Full calendar

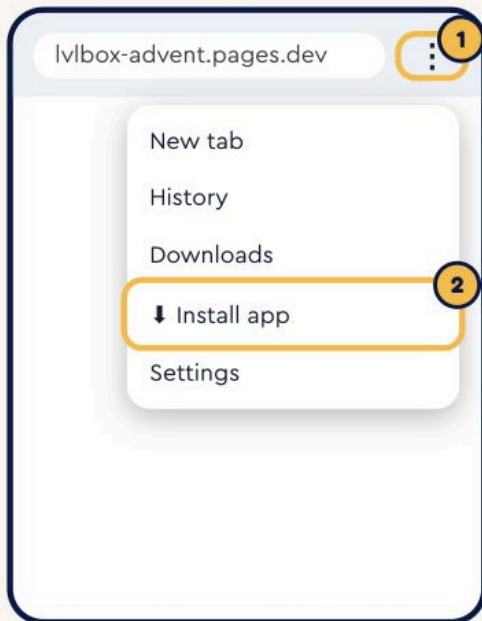

this is the calendar after purchase

You can delete the demo after buying the calendar.

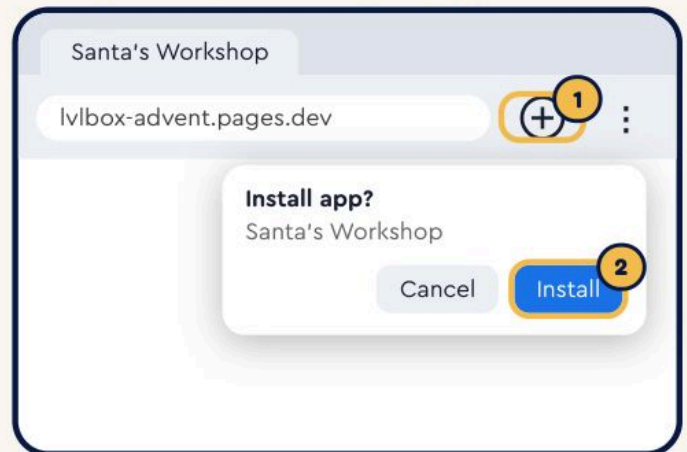

Installing on Android and computer

Android (Chrome)

- 1 Tap **⋮** at the top right
- 2 Choose **«Install app»** or **«Add to Home screen»**
- 3 Confirm. An icon with Bolt appears on your screen

Computer (Chrome, Edge)

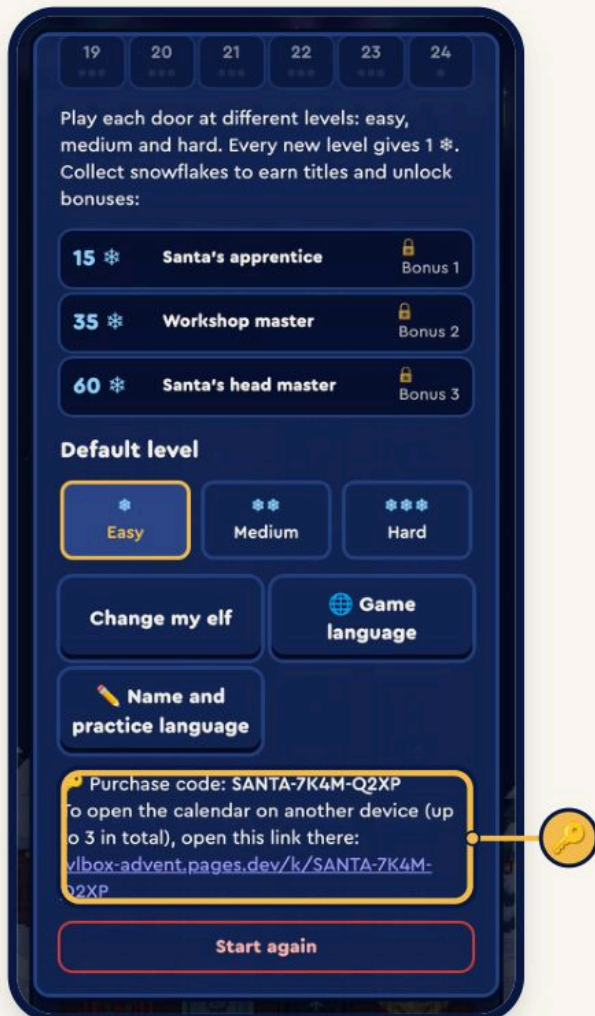

- 1 Click the install icon **⊕** on the right of the address bar
- 2 Tap **«Install»**
- 3 The game opens in its own window and an icon appears on your desktop

No icon? **⋮** → «Cast, save, and share» → «Install page as app». In Edge: **⋮** → «Apps» → «Install this site as an app».

💡 You don't have to install it: the game works in the browser. Just bookmark the page. The diagrams are simplified, your menus may look slightly different.

Several devices

One purchase works on **three devices**: for example a phone, a tablet and a computer.

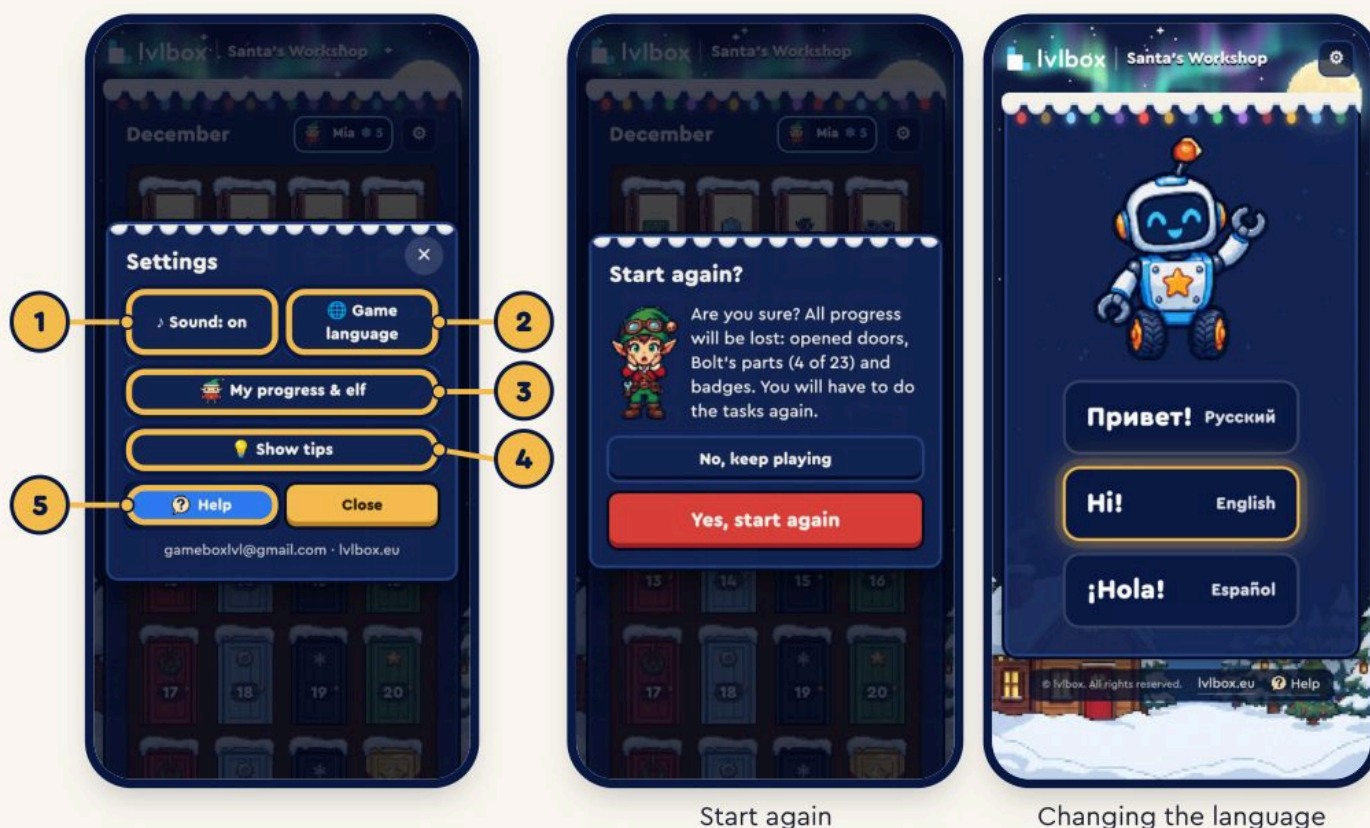

- 1 After payment the calendar opens straight away on the device you paid on.
- 2 Open your profile: tap your name at the top. At the bottom of the profile there is a **personal link** . Send it to yourself by WhatsApp or email.
- 3 Open the link on another device and the calendar switches on there, no password or login needed.
- 4 The calendar can't be installed on a fourth device.

 Game progress is saved separately on each device. If several people play, it's easiest for each to have their own device.

 The link is personal: keep it to yourself. If other people use it, they take up your device places and you may lose access to the calendar.

⚙️ Settings: language, sound, reset

Start again

Changing the language

- 1 **Sound:** on or off. When it's off, the note 🎵 is crossed out.
- 2 **Game language:** Russian, English, Spanish. Your progress is kept.
- 3 **My progress & elf:** your profile, changing your name and practice language, the «Start again» button.
- 4 **Show tips:** show again where everything is.
- 5 **Help:** this guide and how to contact us.

⚠️ «Start again» deletes all progress: doors, parts, snowflakes. The game asks you twice to make sure.

Frequently asked questions

? A door won't open

Each door opens on its own day in December. The game shows how many days are left. The time comes from our server, so changing the clock on your device won't help.

? My progress is gone

Progress is saved in the browser. It disappears if you clear your history and site data or open the game in incognito mode. Play in the same browser or in the installed app.

? A PDF won't download

Check your internet connection and try again. On iPhone the PDF opens in a new tab: tap «Share» → «Save to Files». You can download all PDFs again from your profile.

? No sound

Check the sound button in the settings. On iPhone turn off silent mode with the switch on the side of the phone.

? A fourth device isn't allowed

One purchase works on three devices. Write to us if you want to replace one of them.

? I paid but have no access

Check the email from Stripe or write to us. Tell us the email you paid with and we'll send you your personal link.

? I have two icons: «Advent demo» and «Workshop»

That's normal: the demo and the full version install separately, each with its own progress. You can delete the demo with the DEMO label once you've bought the calendar. If you won't mix them up, keep both.

? Can I play offline?

After the first load most of the game works offline. New doors and PDFs need the internet.

? Is it for adults too?

Yes! The calendar is for everyone who wants to believe in a little magic, catch the holiday spirit and feel like a child again for a few minutes. Choose the hard level and do the screen-free tasks with the whole family.
